Superblade Duo

Superblade Duo

Value for money, fitness for use

The Edel Soccer Superblade Duo is a system based on the traditional monofilament fibre. Over the years, pitches made of this fibre have proven themselves as a substrate for football. The fibres' triangular shape ensures durability and guarantees a high performance throughout the its lifespan. The Edel Soccer Superblade Duo system has been designed for use in combination with various substrates and infill materials. This enables Edel Grass to supply a customized system for any conceivable location.

Applications

- Professional Stadium Quality
- FIFA**
